Read the following passage then answer the questions :

Which job do you want to do when you leave school ? 180 years ago, there were not many choices. Some people took academic jobs such as becoming a lawyer or an accountant. Others took jobs that needed vocational-skills, such as being a farmer. Today, however, there are hundreds of new kinds of jobs which we did not have just ten years ago. This is good news for young people today, because there are many new and exciting jobs that they can do.

An example is computer programming for mobile phone companies. Mobile phones are developing every year, and the phone companies need people to help to develop them even more. Another new job is something called library science. This is known how to understand information on the internet. This is very important for businesses which have a lot of information about their customers, and want to know how to use it so they can sell them things. So there are a lot of opportunities for work in the future, but they may not be jobs that you have heard of before.

Choose the correct answer from a, b, c or d:

2. Read the following passage , then answer the questions : (12 Marks)

The Pharos at Alexandria was probably the first lighthouse in history .The Greek word (Pharos) means an ancient lighthouse or beacon to guide sailors and ships. It was built in the third century BC and took its name of Pharos from the island on which it stood . It stood there for over 1500 years and in working order for nearly a thousand years. With a height of over 100 metres (330 ft) , it was so impressive that it made it onto the established list of the Seven Wonders of the Ancient World . The island of Pharos was at the western edge of the mouth of the River Nile in Egypt , where Alexander the Great founded his city of Alexandria in 331 BC. Alexandria was planned from the beginning to be not only the proud capital of Egypt , but also an important port . It became both of these things .With its wide , straight streets , its royal palaces , its famous library , its museum of arts and sciences where scientists could live and study free of charge , it was perhaps the finest city of the Mediterranean Region . Alexandria had a serious disadvantage as a centre of trade : sailors in the Mediterranean had difficulty in finding and entering the port .This was because the land at the mouth of the Nile was very flat , and so a sailor did not know where he was until he was near the coast . Fires were used in the ancient world to guide ships to land . And so the idea for a giant tower with a fire on top–in other words a lighthouse – was born.The result was the famous building:the Pharos at Alexandria.

Read the passage then choose the correct answer from a, b, c or d:

The honeybee is a very unusual kind of insect. Unlike other insects, which live alone, the honeybee lives as a member of a community. These bees live together in what is known as a bee colony. The head of the colony is called the queen bee. She is larger than the rest of the bees. Her main task in the colony is to lay eggs. Most of the other bees are the worker bees. These bees collect nectar and pollen from flowers. The nectar that is carried by the worker bees is deposited on the hive and then converted into honey. The worker bees also help look after the young bees. As soon as the eggs are hatched, the worker bees feed the young bees with pollen and nectar. The third type of bee found in the colony is the drone or male bee. The main task of such a bee is to mate with a new queen. The queen bee has a lifespan of about three years. During this period, she would have laid more than half a million eggs. When the queen bee is dying, a new queen would be groomed. This new queen would eventually take over the 'duties' of the old queen when the latter dies. Bees are small but they play a big role in the ecosystem. They play an important role as a pollinator for crops. It is vital for food security of human beings. Hence we must control our activities and help protect honeybees.

Read the following passage, then answer the questions:

In Egypt, the tourism industry has come to hold a position of great importance lately. It is felt that it could help increase the national income. In some European countries, tourism has brought in millions of dollars yearly, although they lack the natural and historical attractions we have in Egypt. We could, for instance, establish tourist villages for children on the Red Sea. We could teach fishing, swimming, diving and sailing there. Another good idea would be a village in the New Valley for horse riding. And what about villages for people with health problems like rheumatism? The warm dry climate of Aswan and Helwan would certainly help them get better.

Our tourist today wants efficient and friendly service. He would probably prefer to try our samples of our local food rather than to eat the international meals, which are served, in some places. It must also be remembered that most tourists nowadays are seldom rich. Many of them are students or hardworking employees. So what is needed is not expensive hotels but clean comfortable places to sleep and eat in at reasonable prices. This, too, would encourage Egyptians to travel more and more around their lovely country.

Read the following passage, then answer the questions:

For most people in our modern world, money is the first thing, and sometimes the only thing that measures success in their life. So money has become the first common goal for everybody. However, there is something else that can be the measurement of success in life .One important thing that defines success in our lives is our careers. With different careers, we will have different goals and measurements of our success.

If you are an athlete, your success can be measured by lots of things such as winning tournaments, breaking records, playing in the top league or competing in the Olympics. If you are a scientist, the success in your life will mostly depend on your researches. If you are a musician, playing in the country's orchestra or a number of your CDs that have been sold can be counted as the measurement of your success. So we can see that another measurement of success in your life besides money is how much you have succeeded in your career.

Choose the correct answer from a, b, c or d:
21. According to the writer, ... measures our success.

Read the passage then choose the correct answer from a , b . c or d :

On a cold day in winter, a woman was walking home when she noticed a snake lying on the other side of the road. It was hardly moving and was obviously dying of cold. The woman, being kind hearted, took off her scarf, wrapped the snake up in it and went home. There, she put the snake, wrapped in the scarf, next to the cooker where it would get warm and start showing signs of life .

Slowly the snake's body became warm and it left the scarf and started exploring the kitchen, looking for something to eat. The woman found some food for it and the snake, which was very hungry, quickly finished all the food, returned to the scarf next to the cooker and went to sleep. The days went by and the snake fully recovered. The weather remained cold, so the woman hadn't the heart to put the snake outside again. She got used to having the snake around and taking care of it. One day when the woman was busy cooking her lunch, a pain shot through her leg and she dropped the pan of oil she was holding. She looked down at her foot and saw two small holes. The snake had bitten her.

She turned to the snake and cried, "How could you bite me, when I've always been so good to you? Now I'm going to die." The snake seemed to smile at her as it replied" you knew I was a snake when you brought me here, so why are you complaining now? " .
